

“Your Exchange” Pack Installation Guide

version 1.0.1

1. Document purpose

This document describes the process of the WordPress plugin installation to create your own customized exchange website on the basis of ChangeNOW.

2. Description of the Solution

When the installation is completed your website is ready to conduct exchanges.

The exchange plugin contains the following features:

1. Standard flow exchanges. With floating rates.
2. Fixed flow exchanges. With fixed rates.
3. Three color themes to choose from.
4. Fully customizable text fields.
5. Possibility to add a link to your personal site.
6. Personal ChangeNOW account, where you can see and manage all the operations and transactions.
7. Prefilled Privacy Policy and Terms of Use pages.
8. Language localization.
9. Partner's profit system.

Partner's profit system

The installation of our Affiliate Pack offers you an opportunity to earn money with ChangeNOW. Basically, we share a part of our revenue with our partners. In reality, it means that you will receive 0.4% from each and every transaction made through your service. You can track your profit in your ChangeNOW account and then withdraw the funds directly to your personal wallet.

NOTE that you can always make this percentage higher – you can increase your profit to any %, we're fine with any – just contact us at partners@changenow.io.

Please note the following limitations:

1. You cannot add additional pages to the site.
2. You cannot create fiat-to-crypto exchanges.
3. You cannot change the predefined design.

3. Installation guide

1. Authentication

To access the ChangeNOW Partners program you need to generate an API key. Please, follow the link <https://changenow.io/affiliate>

- Click "Sign UP"
- Confirm that you are not a robot and click "Sign UP" button
- Save your API Key and Password.

2. Downloading the installation pack

Your installation pack is available here: [affiliate-pack-v1.0.1.zip](#)

It contains:

- Theme archive (one of the three color schemes)
- Plugin archive

3. Installation process

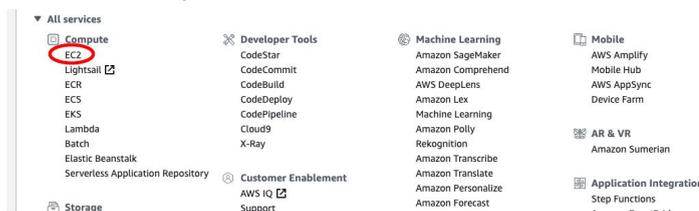

Please note, this document describes creating a site on Amazon Web Services(AWS). If you already have a host, please proceed to 3.2.

3.1. Creating Web Host

3.1.1. Go to AWS Amazon <https://aws.amazon.com/>

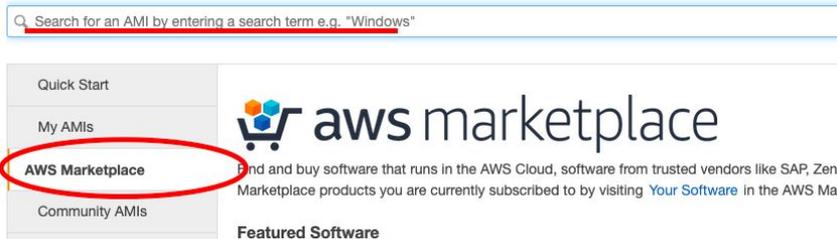

3.1.2. Sign-up

3.1.3. Click on the "All services" section on the main page and choose the EC2 option.

3.1.4. Click on "launch instance"

3.1.5. Select "AWS Marketplace" and type "WordPress"

3.1.6. Select the offer (e.x. WordPress Certified by Bitnami and Automatic) and click "select"

3.1.7. Read the details and click "continue"

3.1.8. Choose the instance type. You are available to choose a free type

	Family	Type	vCPUs
<input type="radio"/>	General purpose	t2.nano	1
<input checked="" type="radio"/>	General purpose	t2.micro Free tier eligible	1
<input type="radio"/>	General purpose	t2.small	1

3.1.9. Click on review and launch

3.1.9.1. Read the details

3.1.9.2. Click "launch"

3.1.9.3. Give your consent and click "launch"

3.1.10. After the installation is completed, return to the EC2 partition

3.1.10.1. Click on the "View instances" button

3.1.10.2. You will be shown your installed hosts

- 3.1.11. To view the password from the WordPress admin panel
 - 3.1.11.1. right-click on the host
 - 3.1.11.2. select the Instance setting
 - 3.1.11.3. click on get system log
 - 3.1.11.4. scroll to the Setting Bitnami application password field
 - 3.1.11.5. copy the password
- 3.1.12. To enter to your site input IP address into the browser bar

```
